This is a great game that can introduce new users to VR, letting them mix potions and cast spells. It's more of an experience than a game, so don't expect a complex story or quests, but it's still a fun, free way to play around with VR physics and see what VR can do. Go Tarheels! @House Undergraduate Library. Due to a bug in the game, I got to a point where I could not continue the story. The game wanted me to speak to the shadow person but would not give me the option to delve deeper. I loaded a few different past saved games but still ended up at the same choke point. I was approximately 90 minutes into the game and didn't want to start over and hope it didn't happen again.

. I cannot stress enough how much you should avoid this game. \$5.00 is about \$10.00 more than this game is worth. I will admit I got a few entertaining starts from the ridiculous jump scares (they are frequent, loud and awkward), but I did not enjoy this title. Allow me to elaborate:

Cons

- **Darkness - It is ridiculously dark at all times in the game. The light sources are laughable. While darkness is used in horror to stimulate the player and create a claustrophobic feeling, darkness is used in *The House to annoy you. It makes the game practically unplayable. If you are willful enough to play through it despite the darkness, you will find the most difficult obstacle is simply navigating the map. I only completed the game using a hedge-maze philosophy to walk through the house because you can only see the walls or floor if you are huddled close to them.***
- **Story (or lack of it) - Probably the weakest of my points because story isn't necessarily the driving factor in a horror game, but the attempted story of this game is very poor. It explains nothing major about who you are, why you are fighting the house, and most importantly why the player should care. Next to the "scares" it means virtually nothing. I am okay with a horror game lacking a story, but I am not okay with a story lacking a point.**
- **Honest Opinion - I love indie horror games, they are marvelous. Even when they are terrible, I can usually take something away from them because the developer(s) put so much of their heart and soul into it that it shows-or at least they were able to make a memorable experience through their efforts. This game has great potential, and could have been executed so amazingly well, but seems to have at some point fallen short. A low price tag does not make up for that. Maybe the developers are planning on revamping the game at some point, but for now they are profiting off anyone willing to buy their work that they either did not finish, or that they put up for sale when it wasn't the best they could make it.**

Pros

- **It's Cheap - You do get what you pay for with this title. I can honestly say I didn't give them a penny more than necessary. Cheap doesn't mean a game can be bad, though. It needs to at least try.**
- **Jump Scare Fest - I am not the biggest fan of jump scares-I prefer to have games scare me in a way that keeps**

the night light on-but there are plenty of them in this game. It can make for some good moments and fun in groups. Alas, they are frequent and non-cannon which will leave you growing tired of them eventually.

- *Unique - The house you visit stays roughly the same in design but experiences other changes as you play. You can tell a lot of work went into designing its stages-much of which goes unnoticed because of how dark it is, but I digress. If the game had gone a different direction, this would be a wonderful feature, but it is still nifty as it is.*

In The End

I am not hard to please. I try to find good in everything I play. That is especially so with games I purchase. However, this game has very little positives in my experience. I beat the entire game and it felt like a chore. If I hadn't started it for a YouTube Let's Play Series I would have never finished it. I cannot recommend this game. Thank you.. If you love UK Railroads, especially older ones, you won't be disappointed!

The Class 37 is very well made and fun to drive & the Scenery is just gorgeous.
I'd love to see more Services with the Class 08 in the future though.

Performance wise i get between 65 - 85 fps with a Gtx 1080, i7-4790k.

. Well, it's a Zup game. If you like the others you'll like this too.... their are 3 thing that make a good endless runners

-change in obsicals/enviroment

-responsiveness

-gameplay depth

this game has non of them. Has anyone found a fix yet?

Solid 13V10

Prob my second favorite next to 4. This game sounded very promising when i bought it back in the end of 2015 the devs made updates often and it was fun to play, Now 4 month after last patch (i was told there was one i jan. 2016 and i can see we are on 1.13 now) but no release note on it and the only thing it did for me is break the game totaly.

Here is what happend after last patch ... i started the game and all i got was a black screen and background music (program not responding) so after a few tries i finally got it closed by force. 2. try i restarted it this time in window mode and it started normaly and i tried to load game, it loaded and i came into an empty base and all my charectors died and i was given the option to load again or return to main menu. Tried to load a few times same result so i figured new patch save games dont work.

So i started a new game there are 3 game modes and 2 of them didnt do anything after i selected charectors and clicked start, so i tried the 3 it let me click start but all i got was a black screen game doesn't crash it just give me black screen and background music after a few min. i forced the game to close.

I just tell it like it is, the game is unplayble im very sad i paid money for this game and i hope no one else pays money for this game unless the devs wake up and fix it, steam need to pull this game down since it's broken and the devs ignore the player not even responding when asked if we can expect a new patch.

I'm not saying its a hox game yet coz i don't know what going on with the dev team but unless they respond soon i'll black list this dev team forever and do what ever i can to spread the word.

And to steam please wake up and test the products your selling this hurts you too, i've always ben a big fan but i'm not going to support greenlights when you keep selling games that is so broken you can't even play them.

I'll give this game 0/10 as its not even a game right now only a start menu.. It's a tad too short, but I really enjoyed Jolly Rover for it's self-aware charm. It's really funny, especially if you play it with a friend.. I recently wrote a bad review about the game. The dummy was broken and nothing worked. If this does happen to you, contact the dev cuz he helped me. I do reccomend this game and I take back wha I said about it. Its cheap so buy it and its fun.

Sincerely,

DDG Killpro82902. I'm actually impressed how well made this is and how everything feels right. The music and the art match each perfectly and the voices are great too. Not sure what I was expecting playing this but it was nice.. Sad to see they didn't continue to develop this. It is a fun game. Co-op would be a lot of fun. Especially on the couch with friends.

You might get an hour or 2 of fun out of this but once you have finished your first ship you have seen pretty much everything the game has to offer. You just repeat the process over and over again.. I can not recommend this game to be honest. It's short. The alternative game modes can be annoying. You can not choose which type of mode you get, you have to spin a wheel so it's random.

Extended play (after "beating" the normal play) could have been redeeming since then you can do the game modes you've missed in the different hidden object scenes, but by then I was so bored, I de installed. I felt no sense of reward but completionists might like to do all modes on all scenes and fill the board with stars :)

Don't buy if not on super sale.

Edit: I forgot to mention the bonus thingies that randomly pop up with which you can earn extra hint tokens: they are timed with a nervous melody that made me rather jittery.. Simply put, the worst Commandos game in the series.

- Graphics are locked at 800 x 600. A step backwards from Commandos 2
- Too many timed missions. Commandos is all about planning and playing at your own pace.
- Too many sudden events triggered for no apparent reasons, often ruining a level especially if one saved at the wrong time.
- Sizes of maps are too small; number of which is too few.

Detailed Patch Notes. **Chapter IV to be Released - Memorial Day:**

We hope everyone's having an excellent weekend! For the development team at Horizon's End, the work never stops! It has been an epic journey bringing our original Dungeons & Dragons homebrew to life. It's kind of surreal to think that, after all these years, in less than a month our story will finally be completed and ready for release. Our supporters' feedback has really kicked us into overdrive and we are planning to release Chapter IV (it is massive.) in its entirety on June 4th. In the meantime, we are polishing up the first half of this enormous tale to be released on 5/28. We hope you haven't been sitting on the edge of your seat for too long! This is the first part of the story where there will be no set party leader and you may choose every member of your team. So get ready for even more customization!. Origami Flight Second Coming **In the pipeline:**

We are a small team with lots of commitments, but we do have the first bug-fix pack planned for release in the upcoming weeks, and a new content update coming this year. Hopefully our new mini campaign, but at least a few new maps if we don't manage to complete the mini campaign. We also want the fighting to become more strategical.

We have great ideas for improvements, but are limited in time and money. Nevertheless we hope to make this title really great..

The Doom Counter Ticks Down...:

Hey everyone,

We've been working on a lot of systems, features, and levels behind the scenes as we get ready for launch. Here's a sneak peek at what we've been working on:

TREACHERY AND DOOM. NEW! Sprint + Camera Changes:

camera is now higher and the zoom can go much further

there is now a sprint. Sprint by holding Shift.

Speedometer is back in at the top center of the screen

let me know if anyone experiences FPS issues anywhere please

18 Closedbeta Test build Patch Update:

Greetings, Adventurers in Ganareth,

For the past few days, we've been working on fixing the game, both in Sacred Path and Shard of Faith. These fixes will be updated in **closedbeta build** for testing and be pushed live next week.

We would like to extend our appreciation to all the players who help pointed out bugs, and provided feedback and suggestion to us.
